

# Instructions for PEAPOP™

1. Use PEAPOP for sprouting and straining.
2. Always clean PEAPOP & jar using hot water and dish soap before use.
3. Soak cleaned seeds or beans for 8 hours.
4. Drain completely.
5. Rinse & drain 3 to 4 times a day with fresh water.
6. Sprouting can take 2-5 days.

# WARNINGS for PEAPOP™ Please Read

**WARNING:** Ingesting food or drink that has been improperly stored in a jar can cause sickness or even death. It is your sole responsibility to get and use safe handling and sprouting information and procedures. Mixed Media Engineering LLC does not provide information or guidance on safe sprouting procedures.

**WARNING:** Eating raw sprouts can lead to food poisoning. Sprouts can be contaminated with harmful bacteria such as E. coli and Salmonella. Children, pregnant women, the elderly and people with weak immune systems should consider avoiding raw sprouts.
